

Ultraviolet Lamp Air Purifier

Purification And Sterilization

H13 class high efficiency HEPA filter

Purification efficiency > 99.9%

Laboratory-level high-efficiency physical purification filter,
air purifier can filter > 99.9% of fine particles such as
aerosol with a diameter of 0.3 micron

According to European and American filtration standards, H13 grade filtration
efficiency is much higher than 99.9%

6m³/h CADR cycle

30 minutes to refresh the whole car air

Powerful turbine power system, tower-shaped air duct drives large air circulation, and quickly purifies to subtle corners

Up to 10m³ global purification

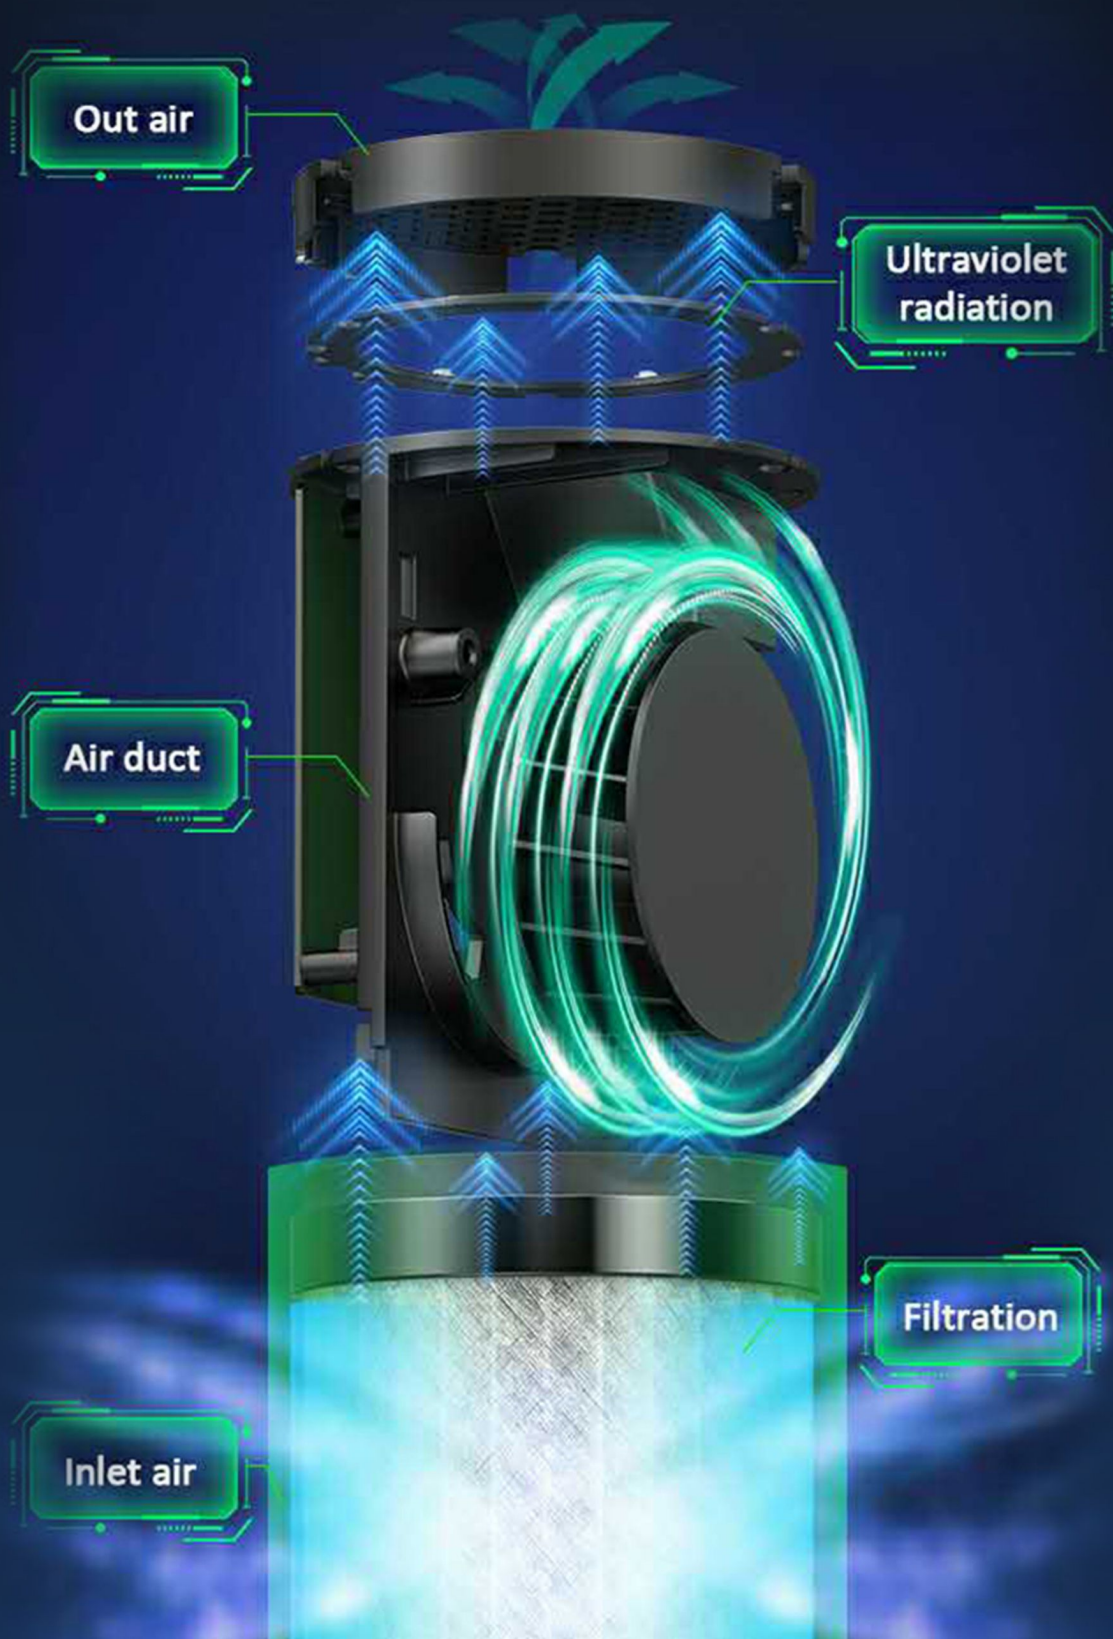

*30 minutes is based on the measured data of the experimental scene of a conventional sedan (about 3m³). It may cause error due to different environments in actual use.

Purify first and then sterilize

Remove harmful substances

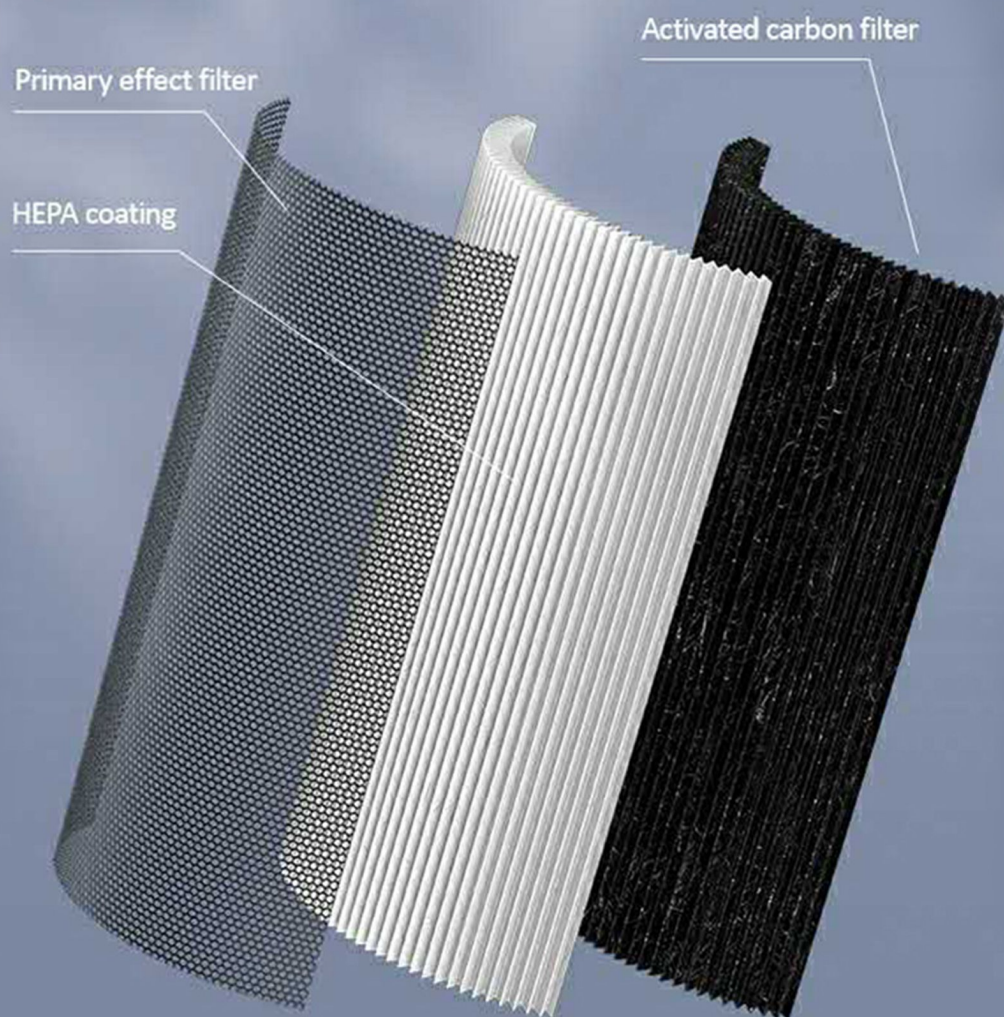

Tower type stereo fan + vertical air duct design, pollutants are gradually decomposed and killed

3 layers of filters

Intercept PM2.5 formaldehyde bacteria etc.

Barrel-shaped pleated filter, continuous collection of large surface area, no impurities to escape

All these pollutants can be filtered

Formaldehyde

PM2.5

Dust

Pollen

Second-hand
smoke

Car exhaust

New car odor

Pet odor

More than strong effect

Life is really long

LED lamp beads

Normal working 10000 hours

HEPA filter

effectively filter 500 hours

*The above data is measured by USAMS laboratory environment, there may be a slight deviation in actual use, it is recommended to replace the filter in time

Small and portable

Your mobile purification expert

Shaped like a thermos cup about 250g
65 * 170mm (diameter * height)

USA Head Office:
Health Guard Supplies
170 W Pomona Ave.
Monrovia, CA 91016

Exclusively Distributed By:
BabyZone Philippines Inc.
Malabon City, Philippines

*To get better purification effect, it is recommended to use the product in a space < 10m³
